SUMMARY

Motivated graduate with a Bachelor of Cyber Security & Behaviour from **Western Sydney University** with **1+ years** of experience in **cyber security**. Seeking a **Cyber Security role** to leverage expertise in **digital forensic analysis** and **security management**.

EXPERIENCE

Customer Solutions Advisor | Vodafone | *January 2026 - Present* | Burwood, Australia

- Exceeded monthly sales goals by **15–30%**, routinely hit over **\$20,000+** in KPIs across several departments, and placed in the top **5%** of store-wide sales performers.
- Every week, I resolved hardware, software, and smart technology problems for more than 60 clients, achieving a customer satisfaction rating of over **90%**.
- Contributed to a **25%** increase in customer retention by negotiating more than **300** product and service packages and customising tech solutions to meet client needs and budgets ranging from **\$100** to **\$10,000**.

Compliance Officer | Paradise Care | *January 2025 - January 2026* | Sydney, Australia

- Conducted internal audits and identified compliance risks.
- Maintained governance frameworks and updated organisational policies in accordance with NDIS standards and guidelines.
- Delivered training on compliance processes and privacy requirements.
- Worked alongside stakeholders for each participant and made sure standards were met and funding was allocated accordingly.

IT Specialist / Internship | AllinIT | *July 2025 - December 2025* | Sydney, Australia

- Proficiency in Microsoft Office and Atlassian tools, such as Confluence and JIRA, which are used on a daily basis to oversee and monitor more than **10+** project tasks per week for cross-functional teams.
- Worked with **2** major cloud platforms (AWS and GCP) to deploy test environments and security configurations, and configured and maintained LAN, WAN, and VPN setups in lab environments.
- Conducted vulnerability scans on more than **5** systems, prepared internal audits, assisted with ISO 27001 compliance efforts, and supported **2** significant security projects.
- Helped simplify frontend functionality in **2** internal tools targeted at enhancing user experience by researching and developing React components.

Digital Forensic Analyst / Internship | Sample Assist | *December 2024* | Sydney/Mati City

- Oversaw more than **12+** digital forensic investigations that strictly followed CREST standards and industry best practices and were centered on national security and new cyberthreats in the Philippines.
- Analyzed more than **200GB** of network traffic using **3** to **5** forensic tools (such as Wireshark, FTK Imager, and Volatility), and was able to identify more than **15** important threat indicators.
- Worked in groups of **3** with **5** interdepartmental teams to profile more than **20+** threat actors, directly assisting in **8** successful law enforcement prosecutions.
- Increased organizational resilience through the creation of **4** risk mitigation techniques, which over a **6** month period reduced possible system vulnerabilities by **30%**.
- Contributed to a **25%** increase in system robustness by creating more than **10** thorough investigative reports that included findings, methodologies, and **15** practical security recommendations.

GRC Specialist React Developer / Internship | Smart App Business Solutions | June 2024 - *December 2024* | Sydney, Australia

- Carried out more than **10** GRC assessments to make sure that industry security standards and ISO 27001 were being followed, finding and fixing any significant compliance gaps.
- Within **3** months, organizational compliance rates increased by **20%** as a result of the development and implementation of more than **5** risk management strategies and internal policies.
- Using React, I created and improved **5** safe, user-friendly web apps while incorporating security and accessibility features to satisfy client and legal requirements.
- Collaborated with **4** cross-functional teams to embed security and compliance protocols into all stages of the Software Development Lifecycle (SDLC).

Cyber Security Analyst / Internship | Sample Assist | *September 2024* | Sydney/Can Tho City

- Worked with stakeholders from academia and industry during a **2** week international research project in Vietnam, developing expertise in data analysis and global communication technology.
- **5** international SMS providers were compared in-depth, with important metrics like cost, delivery efficiency, dependability, and customer satisfaction evaluated to help small and medium-sized businesses choose their vendors strategically.
- Provided **3** customised recommendation reports based on business size, communication volume, and financial constraints after evaluating platforms such as ClickSend, Trumpia, and Textedly.

EDUCATION

Bachelor of Cyber Security & Behaviour | University of Western Sydney | March 2021 - May 2026

- **Relevant Coursework:** Programming Fundamentals, Information Systems in Context, Computer Networking, Computer Security, Digital Investigations and Forensics, Cyber Incident Response and Risk Management.
- New Colombo Scholarship for Vietnam and New Colombo Scholarship for Philippines in 2024.

PROJECTS

Cyber Incident Simulation in 2023

- Participated in a comprehensive cyber incident simulation, mimicking real-world cyber threats.
- Collaborated with a team to develop mitigation strategies and respond to simulated incidents.
- Documented findings and developed recommendations for improvements in cybersecurity protocols.

SKILLS & CERTIFICATES

- **Certifications:** CCNA - Introduction to Networks, NSW Digital-Introduction to Cyber Security, GCC - Information Security Awareness, uSecure Certificate, IAT - Linux, SQL, Cloud, AI, Cyber Security, Data Analytics.
 - **Tools:** Wireshark, Metasploit, Kali Linux, Nmap, TrendMicro, Active Directory, FTK Imager.
 - **Interpersonal Skills:** Communication, Conflict Resolution, Leadership, Adaptability, Teamwork, Risk and Compliance management, Incident responding.
